

Overview of Wisconsin Law Governing Warehouse Liens

Wisconsin has adopted Article 7 of the Uniform Commercial Code (UCC), which creates a statutory lien in favor of a warehouse on goods in possession of a warehouse to secure costs of storage and transportation. *See UCC § 7-209*. With the 2001 amendments to the UCC, Wisconsin law provides for a statutory lien in favor of a warehouse on goods held by the warehouse, and covered by a storage agreement to secure the costs of storage and transportation of such goods.

A warehouse lien may be enforced by public or private sale of the goods covered by the storage agreement. UCC § 7-210(a). The sale may take place at any time and on any terms that are commercially reasonable after notifying all persons known to claim an interest in the goods. *Id.* The notification must include a statement of the amount due, the nature of the proposed sale, and the time and place of any public sale. *Id.* The warehouse sells in a commercially reasonable manner if: the warehouse sells the goods in the usual manner in any recognized market therefore; sells at the price current in that market at the time of the sale; or otherwise sells in conformity with commercially reasonable practices among dealers of the type of goods sold. *Id.* For sales of goods other than goods stored by a merchant in the ordinary course of its business, the UCC requires sale by public auction. UCC § 7-210(b).

Section 7-209 of the UCC provides that a warehouse lien is "effective against any person that so entrusted the bailor with possession of the goods that a pledge of them by the bailor to a good-faith purchaser for value would have been valid." The rights of a warehouse lienor are thus the same rights as would be available to a hypothetical bona fide pledgee. To determine whether a warehouse lien takes priority over a prior, perfected blanket security interest, courts look to the language of a secured lender's security agreement. In *In re Sharon Steel Corp.*, 176 B.R. 384 (Bankr. W.D. Pa. 1995), the bankruptcy court found that a security interest held by a secured lender with a security interest in all of the assets of a borrower was subordinate to the lien of a warehouse under UCC § 7-209. The court found that the secured lender's loan documentation permitted the borrower to incur certain "permitted liens" in the ordinary course of business, including warehouse liens. *Id.* at 388. The court held that this provision "effectively permitted the debtor to transfer its inventory to the [warehouse] as security for the [debtor's] payment of the warehouseman's . . . liens."

By contrast, in *In re Siena Publishers Associates*, 149 B.R. 359 (Bankr. S.D.N.Y. 1993), the court found that a warehouse lien was second in priority to the lien of the secured lender because under the loan documentation, "the debtor could not validly pledge its inventory to a bona fide pledgee for value." Thus, a warehouse's lien priority vis-à-vis the lien of a secured lender depends on whether a court would construe the secured lender's security agreement as allowing for the pledge of collateral to secure obligations incurred for warehousing such collateral.
